

Announcing two new programs: Research Fellows & Partnerships

2:24

we are excited to announce two new programs at The Institute research fellows for individuals working in the field of active inference and Partnerships for organizations looking to engage with and support the active inference ecosystem this video is going to look at the websites for both programs you can learn more at fellows and partnerships. active inference do Institute for research fellows we're looking to catalyze the journeys and the contributions of researchers in active inference from all over the world different career stages we will explore and develop this introduction of the program together and we'll continue to update the website with different questions that are asked we're looking for an application or a pre-submission inquiry describing one or more research projects in detail Andor outlining a more general direction there's more details on the application and the terms on that site for Partnerships we are looking for ways to develop synergistic relationships with other organizations that are in and adjacent to the active inference ecosystem this could be across different domains disciplines regions languages backgrounds so it'll be really awesome to explore what this looks like we imagine that there'll be a lot of variation among partner organizations in

the kinds of contributions and
affordances on both sides and so here
especially we're looking for uh
beginning a conversation while also
having the application template in mind
as we begin also figuring out terms that
make things work for different kinds of
Partners so we hope that these are some
interesting opportunities for you or to
share with someone that you know and we
look forward to how research fellows and
future other kinds of fellows and how
all different kinds of Partners can
start to do some really awesome things
in the ecosystem together all right
email blanket active inference Institute
with any questions or comments on this
bye
