

"Physics as Information Processing" by Chris Fields ~ Course overview

Courses/PhysicsAsInformationProcessing_ChrisFields | Course overview | 2:16

Hello, welcome to the course Physics as Information Processing taught by Chris Fields with Andra Aguirre as a course assistant hosted during 2023 by the Active Inference Institute. This video is an overview of the course website. It's going to cover some of the key pieces of the website and ways to participate. The course homepage hosts the key links and a written course overview. On the course syllabus page, there's a table with each row being one session. So here you can see the topic and the preparation for each of the six lectures and you can see information about the six discussion sections which will be following each lecture by about two weeks. Each lecture and discussion, you can click this blue icon and go directly to the video to re-watch it or watch it live or you can go to the playlist to watch all videos sequentially. So that's one way that you can participate is watching videos live or re-watching them. On the questions and answers page, there's a form that you can submit. You can say, what is time? And if you submit that question, we'll get it on the back end and Chris Fields will answer the question and then the question and answer will come up to the public front end. And along with the transcripts of all sessions, these questions and answers will be part of the publication that we prepare at the end of the course. So we heartily encourage all questions and answers. It's a really easy and important anonymous way for you to contribute. Lastly, you can go to register to join discussions. So if you want to join those live interactive discussion live streams about two weeks after each lecture, you can complete this form and we'll add you to calendar events. So thanks again for your interest in the course, Physics is Information Processing, and we hope to see you either watching and re-watching the videos, asking questions and answers, and maybe even registering to join the discussions. Thanks and see you there.
